

Oktopus interactive software

Interactive presentation and collaboration software

Qwizdom®

OKTOPUS

- **Collaboration and polling**
- **Multi-touch**
- **Multiple tools - Glass mode, annotations and highlighter**
- **Multiple supported languages**

OKTOPUS™ is an interactive presentation and collaboration software. It allows you to annotate and work over or alongside any software application, your existing content, or over a web browser. Available in over 30 languages and compatible with Windows and Mac, OKTOPUS gives everyone – whether in education or corporate, the flexibility to use the application, content and resource of their choice.

As standard, OKTOPUS comes packaged with 5 Qwizdom Notes+ licenses which enhances classroom or boardroom collaboration. This allows users to join live presentations and collaborate in real-time. This all-in-one solution enables screen mirroring, presentation capture, and polling. Users can add media, share annotations, take notes, answer questions, and review content post session. In addition, Notes+ can be used as a note taking application. Quickly organise thoughts and illustrate concepts using media capture, shape, text and drawing tools.
